
Evaluate 10 Ancient Texts RE: Proof of Time Travel

Posted by Eddy_P - 2008/06/07 16:44

For many years, claims of 'Evidence of Time Travel being found by the Australian researcher Ronald Pegg' have been circulating around the internet.

He claimed to have found descriptions in ancient texts that match to the contents of a certain 1995 produced multi-media compact disk. This would mean that somehow, modern technology was taken back in time for ancient people to view.

It is asserted that "The documented accounts in certain ancient texts known as prophetic 'dreams' or 'visions' are about the contents and pictures from the 1995 Ancient Civilizations of the Mediterranean multi-media cd-rom".

Now you have the opportunity to evaluate this specific claim with a 'verse by verse' examination of ten texts that he said contains proof.

Some Results

Posted by Eddy_P - 2008/07/29 05:04

Some results so far

Whether pictures match ancient descriptions as a percentage, where

0-30 is NO,

>30-50 is probably not,

>50-75 is MAYBE,

>75-85 is probably, and

>85 to 100 is YES.

Results from 14 Evaluation Sessions

nil: 0 - 30

2 : >30 - 50

4 : >50 - 75

4 : >75 - 85

2 : >85 - 100

--

14 in total

Average is 67.71 percent, which means it is more than a coincidence.

For these figures to actually be relevant, we need another series of evaluations by at least a 100 people to provide a better overall summary of opinions.

Can you help ?

Can you spare the time to complete the Evaluation Session ?

Purpose of Evaluation Session

Posted by Eddy_P - 2008/08/05 07:51

Some people seem to be not understanding or are missing the point of this evaluation session.

HISTORY:

1. Ronald Pegg made an observation regarding an ancient text and modern cd-rom pictures.

.

2. Ronald Pegg investigated 20 more ancient texts, and made associated observations regarding those ancient texts and

pictures from a modern cd-rom.

3. He proposed an hypothesis - "The documented accounts in certain ancient texts known as prophetic 'dreams' or 'visions' are about the contents and pictures from the 1995 Ancient Civilizations of the Mediterranean multi-media cd-rom".

4. He asserted a Conclusion based upon his observations and investigations - "This is Evidence of Time Travel".

5. He established a general Theory - "Certain noted Angels giving 'visions of the future' who were documented in the sacred texts of the Hebrew, Christian, Muslim, and Mormon faiths (and others) - were not of a divine origin...as they were actually human chrononauts taking back warning messages concerning false religions, details of certain historical and astronomical events, and a chronology regarding a future war. Those technological time travellers were misunderstood and perceived as 'Angels'".

This session is NOT evaluating points 3 & 4 & 5. These may be discussed in later sessions.

This session IS evaluating the validity of Pegg's original OBSERVATIONS (points 1 & 2) by asking "Do the descriptions in ancient texts match to the pictures seen on a modern cd-rom.

To do this I am asking you to assist with the evaluation process by testing, with a 'verse by verse' examination, ten texts that Pegg said contains proof. [LINK to Evaluation Session](#)

New Interactive Evaluation Session: Are Ronald Pegg's Observations Correct ?

During 1996 to 2002 the Queensland researcher Ronald Pegg made a series of amazing observations. He said that 'Descriptions from over 30 different Ancient Texts matched to pictures from a modern cd-rom'.

He then inferred that stories about 'angels' and 'gods' in ancient chronicles were telling of encounters with 'time messengers' who showed ancient people certain information from a modern compact disk.

Pegg then made a bold claim that "The documented accounts in certain ancient texts known as prophetic 'dreams' or 'visions' are about the contents and pictures from a particular modern cd-rom."

I conducted an online study of some texts related to this between January and July 2008 entitled "Evaluate 10 Ancient Texts that Reveal Proof of Time Travel".

The feedback I received derived a mean average validity score of 64.74 percent. Many comments I received reflect why this figure is lower then expected, such as 'A Capital icon does not look like an eagle flying', 'A She-wolf does not look like a cow, ox nor calf', 'Only two questions are not a large enough sample'.

The proprietor of World Breaking Discoveries (Publishing, Australia) on 1st September 2008 re-evaluated Pegg's claims and found some blunders and oversights in the following...

Page 1:

sea of glass like unto crystal
in the midst of the throne and round about the throne
the second beast like a calf
and the fourth beast like a flying eagle

Page 2:

out of the midst of the fire. Also out of the midst thereof came the likeness of four living creatures
the face of an ox
the face of an eagle

Page 3:

the four winds of the heaven
strove upon the great sea
the second like to a bear, and it raised up itself on one side, with...

three ribs in the mouth of it between the teeth of it*
a leopard* (*better pictures)
and it had great iron teeth

Page 4:
Instead of just 2 questions, there are now 11 and five verses examined.

Page 5:
a womb of monsters, a bull, an eagle

Page 9:
Fowls, beasts, cattle, creeping things

A new interactive evaluation session that addresses these blunders or oversights allows YOU to input whether you see a match between ancient descriptions and modern cd-rom pictures.

Re:Purpose of Evaluation Session

Posted by Eddy_P - 2008/10/13 07:05

Results for June to August 2008

Number of replies received: 54
mean general average score was 64.74 percent.

Results for September/October 2008 (to date)

Religious people seem to be scoring the validity of Pegg's Observations very low: between 00.00 to 50.04 percent.
Some do not bother to complete the evaluation.

Non-religious people: between 61.36 to 85.33 percent.
